Mutual acknowledgement and educational intentionality

In a pluralistic community

Every human being is educable

A cultural heritage must be transmitted
ENGAGEMENT AND PERSPECTIVES

- To contribute to both the integral development of the person and the common good
- For a vision of the person that takes into account his or her desires and needs, abilities and skills, difficulties and weaknesses, strengths and resources
- For an inclusive community, through social and cultural diversity
- A personalized welcoming community
- A scientific study community
- A caring and good-will learning community

WORKSHOPS TO EXCHANGE AND ANALYZE PRACTICES ON DISTANCE LEARNING

- Frequency about once a month
- Open to all teachers/trainers of the university community
- Active and cooperative pedagogy
- To bring out questions and skills
- Different themes
- Posted online on the distance learning platform
Objectives: To put the learner at the heart of the system in order to develop both a pedagogical relationship and a relationship with knowledge, pedagogical devices nourished by inclusiveness, in order to bring everyone to the excellence that is theirs.

Research questions: What will we generate as an integral education in the digital age? What challenges can distance learning meet? How can it contribute to integral education? What fruitful interactions?
